Quality and risk

- Forensic screens: Altman Z n/a (n/a); Piotroski F n/a/9; Beneish M n/a (n/a). Screens flag, they do not prove.
- Accounting quality: CAUTION; reasonableness: n/a.
- Confidence gate: Reported statutory provenance coverage is low (0% of fields read from a filing; a further 100% are provider-reported statements, which are attributed but not statutory).
- Confidence gate: ONE_OFF_UNMEASURED: FY26: PBT 2,932 - tax 323 = 2,610, reported profit 4,415; 1,806 Cr (61.6% of PBT) is not itemised by the data source (a share of associates / JVs, discontinued operations or exceptional items would each produce it; only the filing says which). This is a gap in the served data, not a finding of an accounting problem. No plug is inserted. Trailing P/E and EPS built on this profit are withheld; the EBIT-based FCFF does not read it.
- Not measured: Linked three-statement forecast (the reported FY26 balance sheet does not balance as opened (assets 73465 vs liabilities + equity 47499 Cr); no forecast …)
- Not measured: DCF cross-check (Not eligible by methodology: FMB_MASTER_METHODOLOGY/MODEL_SELECTION.yaml routes this archetype (REAL_ESTATE) to …)

DLF Limited (DLF.NS): institutional brief

Executive Summary

No fair value is published. The valuation is withheld: Valuation routing failed: [REAL_ESTATE_NAV_INPUTS_UNAVAILABLE] DLF.NS: project-level saleable area, realisation, land-bank value, rental NOI, occupancy and attributed discount-rate evidence are not present in the canonical provider spine. Refusing the former carrying-value DCF floor: it used a 4% terminal growth rate, 8.5% debt cost, 1.30 beta and 25.17% tax fallback while labelling the result NAV.

A withheld valuation is a stated outcome, not a gap to be filled; nothing below substitutes a number for it.

- Latest reported year FY26: revenue INR 8,194 crore, EBITDA INR 1,449 crore, profit to owners INR 4,415 crore.
- Relative: P/E 38.8x against a peer median of 24.8x (4 peers, low sample).

Business and Investment Context

DLF Limited is classified Real Estate Developer (Real Estate Developer), routed to Sum of the parts on the economics of the business: Residential and commercial developer modeled on project presales volume (MSF), average realization (₹/sq ft), project collections, construction spend, and land acquisition NAV.

Historical Performance

INR crore	FY23	FY24	FY25	FY26

Forecast and Economic Drivers

No linked three-statement forecast is published: the reported FY26 balance sheet does not balance as opened (assets 73465 vs liabilities + equity 47499 Cr); no forecast is built on it. Any DCF forecast, sensitivity and cross-checks are published in the valuation section, separately.

Valuation

The valuation is withheld (see the Executive Summary); no method range is shown because none was produced.

Peer Comparison

Whole-company comparable set: Listed Indian residential and commercial developers: project-cycle revenue recognition, lumpy cash flow, net-asset-value led.

Metric	Subject	Peer median	Interquartile range	Peers
P/E	38.8x	24.8x	23.8x to 26.8x	4 (1 outlier excl.)
EV/EBITDA	n/a	n/a	n/a to n/a	1
P/B	3.8x	3.1x	2.4x to 3.8x	5
FCF yield	3.6%	0.5%	-5.1% to 0.7%	5
ROE	9.7%	10.1%	9.5% to 13.1%	5
EBITDA margin	17.7%	29.1%	27.1% to 29.3%	3 (2 outlier excl.)
Net debt / EBITDA	n/a	n/a	n/a to n/a	1

The median is the headline statistic; quartiles and the sample size are shown because a median of three is not a median of ten.

Reverse Valuation and Scenarios

Reverse valuation: a reverse DCF inverts a consolidated FCFF DCF, which this archetype's methodology prohibits

Risks and Invalidators

- Linked three-statement forecast: withheld. the reported FY26 balance sheet does not balance as opened (assets 73465 vs liabilities + equity 47499 Cr); no forecast is built on it
- DCF cross-check: withheld. Not eligible by methodology: valuation methodology routes this archetype (REAL_ESTATE) to Sum of the parts and prohibits the consolidated FCFF DCF. ...
- Reverse DCF: withheld. a reverse DCF inverts a consolidated FCFF DCF, which this archetype's methodology prohibits
- Segment analysis: withheld. no Ind AS 108 segment disclosure was read for this issuer and the provider published no split
- Line-by-line statutory statements: withheld. no audited statutory XBRL filing was served for this issuer; the statements are not laid out line by line

Key Assumptions and Source Notes

Discount rate: WACC 14.43% (risk-free 6.95%, beta 1.36, equity risk premium 5.50%); terminal growth n/a%. Reference only: the primary method does not discount.

No user override applied: every driver is the history-derived recommendation or a disclosed model policy.

Statements: Consolidated annual figures, INR crore; fiscal year ending March. Price: NSE official close of 2026-10-30. Peer figures come from one provider extractor applied identically to the subject and every peer; free cash flow is operating cash flow less capital expenditure. This brief restates the model's published figures. It is not investment advice; a withheld or low-confidence valuation says so rather than offering a number.

B. Annual and quarterly statements

Reported years (A) and FMB's forecast (E) on one axis. A line the source does not carry is n/a, never zero. All amounts INR crore unless stated (1 crore = 10 million); fiscal year ends 31 March; A = reported, E = FMB forecast; dates are ISO (YYYY-MM-DD).

No linked three-statement forecast was published for this issuer: the reported FY26 balance sheet does not balance as opened (assets 73465 vs liabilities + equity 47499 Cr); no forecast is built on it Only reported years are shown.

These statements are provider-reported: no audited statutory (XBRL) filing was served for this issuer, so they are attributed to their provider and are not audited. Source ledger: annex K.

Trade Payables	3.1%	2.8%	3.3%	2.3%

Common-size uses reported years only; forecast years are not restated into common-size by the engine.

D. Operating segments

Ind AS 108 segment disclosure as filed (gross of inter-segment eliminations).

Segment split not available for this issuer: no Ind AS 108 segment disclosure was read for this issuer and the provider published no split. Nothing is estimated.

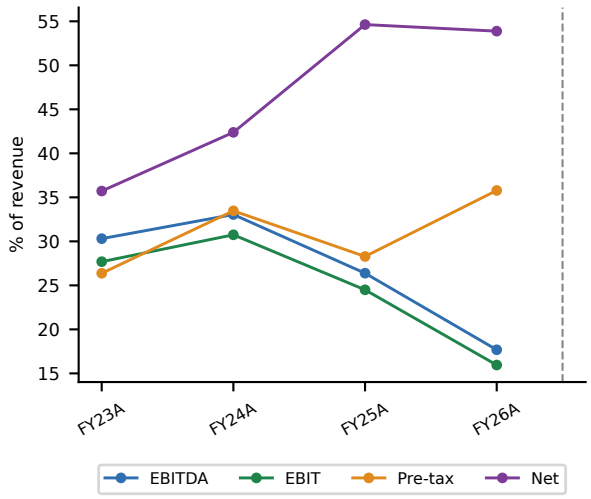

E. Expenses and margins

Cost lines and margins, reported then forecast.

G. Working capital and capital allocation

Working capital

INR crore	FY23A	FY24A	FY25A	FY26A
Trade receivables	549	538	802	847
Inventories	19,361	21,154	24,621	24,717
Trade payables	1,644	1,655	2,261	1,720
Trade working capital	**18,266**	**20,037**	**23,162**	**23,844**
Receivable days (on revenue)	35	31	37	38
Inventory days (DIO, on cost of goods sold)	n/a	n/a	n/a	n/a
Payable days (on operating expenses)	151	140	140	93

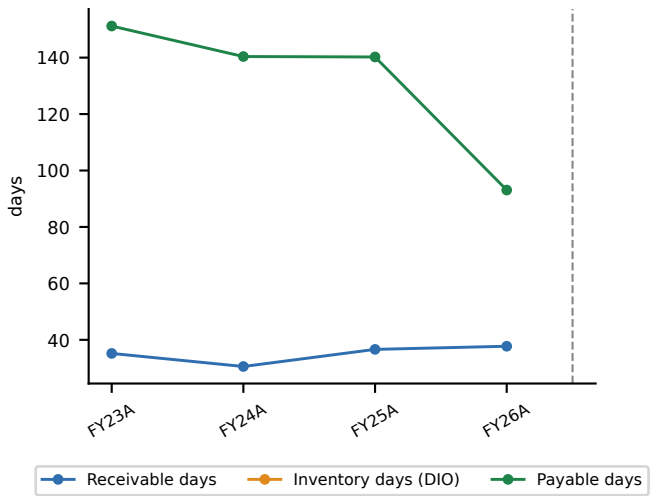

Days use a 365-day year. Inventory days are the engine's DIO: inventories over cost of goods sold (reported cost of revenue, else employee plus other operating expenses; n/a where neither is served). Payable days are stated against total operating expenses, as the engine's DPO is, the only payables cost base the statements all carry.

Capital allocation and leverage

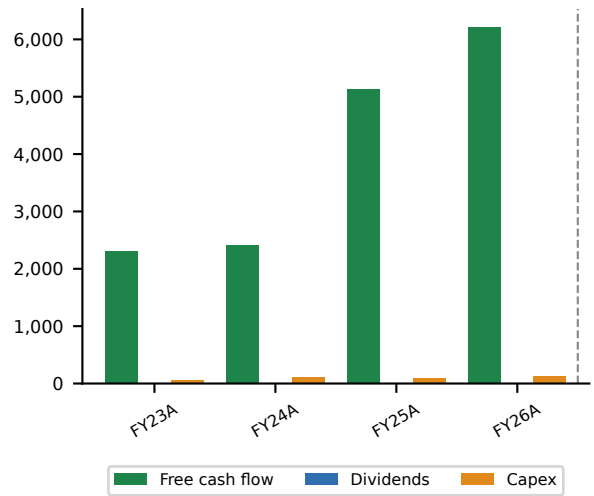

INR crore	FY23A	FY24A	FY25A	FY26A
Cash from operations	2,375	2,539	5,235	6,347
Capital expenditure	64	116	96	129
Free cash flow (CFO - capex)	**2,311**	**2,423**	**5,139**	**6,218**
Dividends paid	n/a	n/a	n/a	n/a
Dividend payout (of net income)	n/a	n/a	n/a	n/a
Debt issued / (repaid)	n/a	n/a	n/a	n/a
Net debt (borrowings - cash - short-term investments)	**n/a**	**n/a**	**n/a**	**n/a**
Net debt / EBITDA (x)	n/a	n/a	n/a	n/a

Net debt here excludes lease liabilities and long-term investments; the valuation bridge in the brief treats those as the method requires.

Active scenario in this snapshot: BASE. FMB publishes a re-valued bear and bull fair value only for a sum-of-the-parts issuer; for other methods the scenario inputs above and the sensitivity grid (next pages) are what it publishes, and no bear or bull value is invented here.

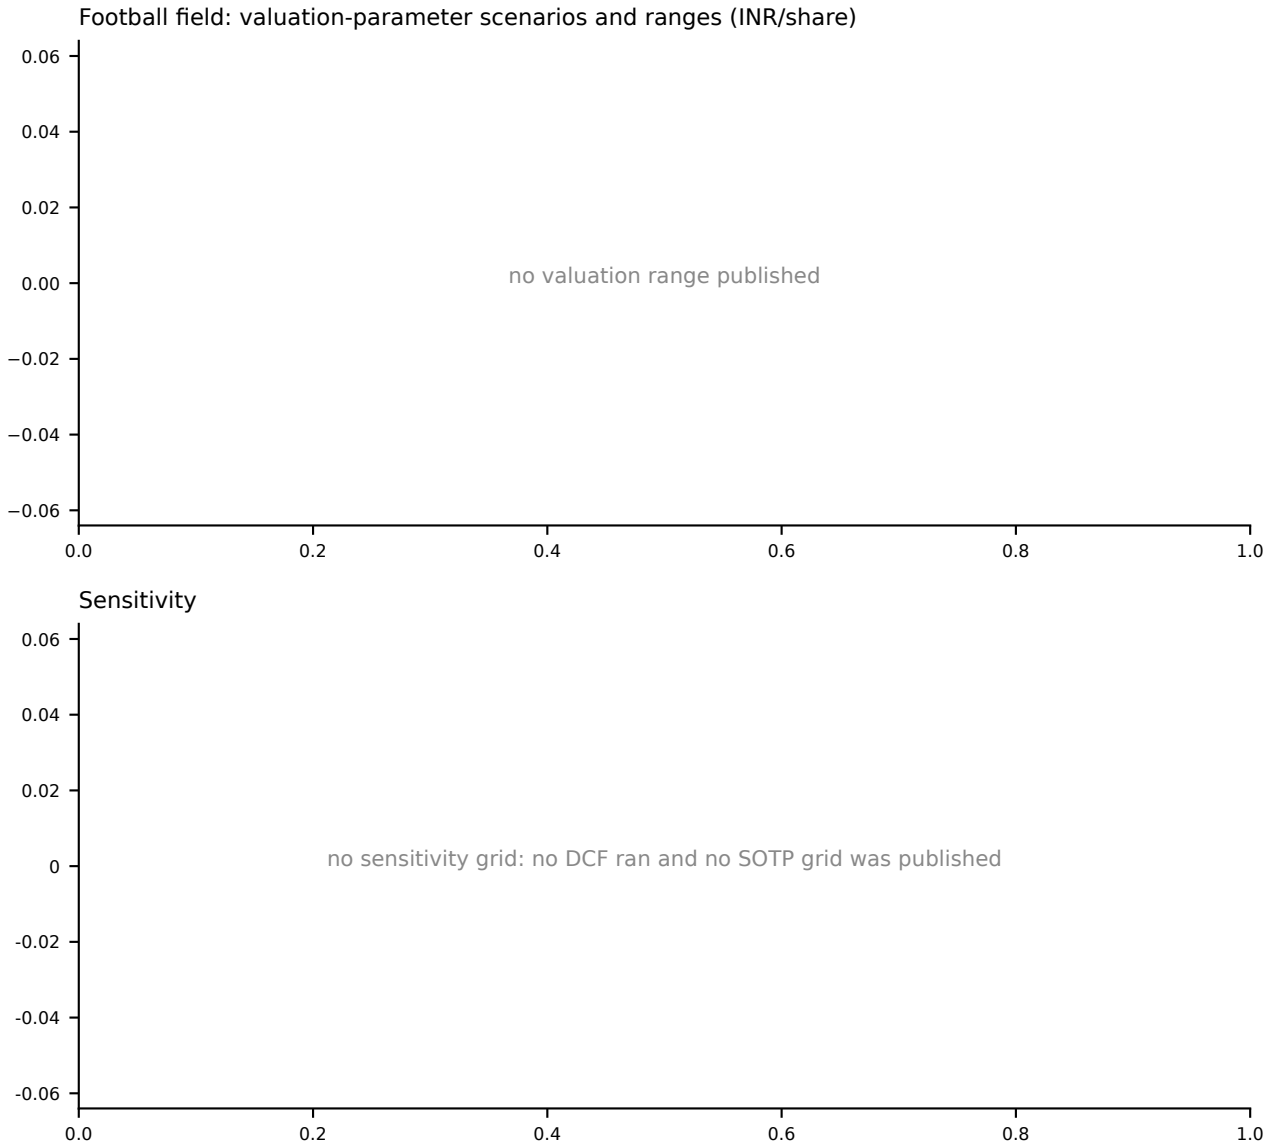

Relative value

Trading comparables: consolidated trading comps are not the method for this archetype (SOTP_SUM_OF_PARTS); segment peers are shown inside the SOTP. The peer statistics (median, quartiles, sample size) are in the brief and on the workbook's Peers sheet.

Reverse valuation: what the price implies

Reverse valuation: NOT_ELIGIBLE. a reverse DCF inverts a consolidated FCFF DCF, which this archetype's methodology prohibits

DLF.NS · valuation: SOTP_SUM_OF_PARTS

I. Valuation: ranges, sensitivity grid and stress test. Source: FMB snapshot snap_DLF_NS_b844a0b66419; statements from provider-reported secondary statements, not audited (annex K); price 2026-10-30. All amounts INR crore unless stated; fiscal year ends 31 March; A = reported, E = FMB forecast.

J. Monte Carlo: histogram, CDF, tornado, fan

SUPPLEMENTARY / EXPERIMENTAL: a sensitivity of the DCF to correlated economic drivers. It is not a forecast and not a second fair value.

Not drawn for this issuer. Engine statement: no Monte Carlo was published

A distribution is never invented where the engine withheld one. An issuer valued by sum-of-the-parts, a residual-income model or without an FCFF DCF has nothing to simulate.

Limits recorded with the snapshot

- Valuation status INVALID: Model marked invalid. Valuation routing failed: [REAL_ESTATE_NAV_INPUTS_UNAVAILABLE] DLF.NS: project-level saleable area, realisation, land-bank value, rental NOI, occupancy and attributed discount-rate evidence are not present in the canonical provider spine. Refusing the former carrying-value DCF floor: it used a 4% terminal growth rate, 8.5% debt cost, 1.30 beta and 25.17% tax fallback while labelling the result NAV.
- Failure reason: Valuation routing failed: [REAL_ESTATE_NAV_INPUTS_UNAVAILABLE] DLF.NS: project-level saleable area, realisation, land-bank value, rental NOI, occupancy and attributed discount-rate evidence are not present in the canonical provider spine. Refusing the former carrying-value DCF floor: it used a 4% terminal growth rate, 8.5% debt cost, 1.30 beta and 25.17% tax fallback while labelling the result NAV.
- Confidence LOW: Confidence capped at LOW due to 2 gate violation(s): Reported statutory provenance coverage is low (0% of fields read from a filing; a further 100% are provider-reported statements, which are attributed but not statutory). ONE_OFF_UNMEASURED: FY26: PBT 2,932 - tax 323 = 2,610, reported profit 4,415; 1,806 Cr (61.6% of PBT) is not itemised by the data source (a share of associates / JVs, discontinued operations or exceptional items would each produce it; only the filing says which). This is a gap in the served data, not a finding of an accounting problem. No plug is inserted. Trailing P/E and EPS built on this profit are withheld; the EBIT-based FCFF does not read it.
- Withheld / not measured: Linked three-statement forecast -- the reported FY26 balance sheet does not balance as opened (assets 73465 vs liabilities + equity 47499 Cr); no forecast is built on it

- Withheld / not measured: DCF cross-check -- Not eligible by methodology: FMB_MASTER_METHODOLOGY/MODEL_SELECTION.yaml routes this archetype (REAL_ESTATE) to SOTP_SUM_OF_PARTS and prohibits the consolidated FCFF DCF. It is not forced to populate a sheet, and no DCF reading is published.
- Withheld / not measured: Reverse DCF -- a reverse DCF inverts a consolidated FCFF DCF, which this archetype's methodology prohibits
- Withheld / not measured: Segment analysis -- no Ind AS 108 segment disclosure was read for this issuer and the provider published no split
- Withheld / not measured: Line-by-line statutory statements -- no audited statutory XBRL filing was served for this issuer; the statements are not laid out line by line
- Withheld / not measured: Audited-filing statements -- The statements are a secondary tier's (SCREENER_INDIA); NSE corporate actions: RIGHTS_BLOCKED: NSE session-cookie API is paused by the owner pending legal review (nseSessionCookie); set ASTRA_ALLOW_NSE_SESSION_API=1 only after that review | NSE audited XBRL: NSE filing index unreachable: RIGHTS_BLOCKED: NSE session-cookie API is paused by the owner pending legal review (nseSessionCookie); set ASTRA_ALLOW_NSE_SESSION_API=1 only after that review.
