In this report

A. Macro, industry and business context · B. Annual and quarterly statements · C. Common-size statements · D. Operating segments · E. Expenses and margins · F. Property, plant and equipment, capex and depreciation · G. Working capital and capital allocation · H. Ratios, DuPont and forensic screens · I. Valuation: ranges, sensitivity, stress test · J. Monte Carlo: histogram, CDF, tornado, fan · K. Source ledger and accounting checks · L. Snapshot record and verifier receipts

All amounts INR crore unless stated (1 crore = 10 million); fiscal year ends 31 March; A = reported, E = FMB forecast; dates are ISO (YYYY-MM-DD).

Not investment advice. A withheld, low-confidence or experimental output says so rather than offering a number. The Monte Carlo is a supplementary sensitivity, never a second fair value.

HDFC Life Insurance Company Limited (HDFCLIFE.NS): institutional brief

Executive Summary

No fair value is published. The valuation is withheld: Forecast model failed: [INSURANCE_DRIVER_UNAVAILABLE] HDFCLIFE.NS: an insurance forecast requires reported gross written premium (GWP) and premium earned; annualised premium equivalent (APE); value of new business (VNB) or VNB margin; claims and benefits incurred, and the change in actuarial policyholder reserves; investment income on the policyholder fund; shareholders funds and solvency ratio. The provider spine carries none of them, and an insurer's premium, claims and reserve movement cannot be derived from a general-purpose income statement. The forecast is withheld rather than assembled from sector constants.

A withheld valuation is a stated outcome, not a gap to be filled; nothing below substitutes a number for it.

- Latest reported year FY26: revenue INR 99,432 crore, EBITDA INR 1,753 crore, profit to owners INR 1,912 crore.

Business and Investment Context

HDFC Life Insurance Company Limited is classified Life Insurance (Unclassified), routed to EMBEDDED_VALUE on the economics of the business: Long-duration actuarial liability book modeled on Annualised Premium Equivalent (APE), Value of New Business (VNB), VNB margin %, persistency and Indian Embedded Value (IEV).

Historical Performance

INR crore	FY23	FY24	FY25	FY26
Revenue	70,207	1,01,482	96,922	99,432
EBITDA	80	646	1,028	1,753
EBITDA margin	0.1%	0.6%	1.1%	1.8%
Profit to owners	1,368	1,574	1,811	1,912
Diluted EPS (INR)	6.30	7.24	8.33	8.80
Operating cash flow	6,883	10,721	15,597	22,625
Capex	-88	-136	-301	-287

Forecast and Economic Drivers

No linked three-statement forecast is published: The forecast for archetype INSURANCE is built by a sector model that does not expose operating-company drivers; no generic three-statement model is forced onto it.. Any DCF forecast, sensitivity and cross-checks are published in the valuation section, separately.

Valuation

The valuation is withheld (see the Executive Summary); no method range is shown because none was produced.

Peer Comparison

No peer statistics are available: peer sample too small for statistics (n=3); peer values are shown, no median/quartile is claimed. No median is claimed.

Reverse Valuation and Scenarios

Reverse valuation: a reverse DCF inverts a consolidated FCFF DCF, which this archetype's methodology prohibits

Risks and Invalidators

- Linked three-statement forecast: withheld. The forecast for archetype INSURANCE is built by a sector model that does not expose operating-company drivers; no generic three-statement model is forced onto it.
- DCF cross-check: withheld. Not eligible by methodology: valuation methodology routes this archetype (INSURANCE) to EMBEDDED_VALUE and prohibits the consolidated FCFF DCF . …

- Reverse DCF: withheld. a reverse DCF inverts a consolidated FCFF DCF, which this archetype's methodology prohibits
- Segment analysis: withheld. no Ind AS 108 segment disclosure was read for this issuer and the provider published no split
- Line-by-line statutory statements: withheld. no audited statutory XBRL filing was served for this issuer; the statements are not laid out line by line

Key Assumptions and Source Notes

Discount rate: WACC 12.05% (risk-free 6.95%, beta 0.93, equity risk premium 5.50%); terminal growth n/a%. Reference only: the primary method does not discount.

No user override applied: every driver is the history-derived recommendation or a disclosed model policy.

Statements: Consolidated annual figures, INR crore; fiscal year ending March. Price: NSE official close of 2026-10-30. Peer figures come from one provider extractor applied identically to the subject and every peer; free cash flow is operating cash flow less capital expenditure. This brief restates the model's published figures. It is not investment advice; a withheld or low-confidence valuation says so rather than offering a number.

A. Macro, industry and business context

All amounts INR crore unless stated (1 crore = 10 million); fiscal year ends 31 March; A = reported, E = FMB forecast; dates are ISO (YYYY-MM-DD).

Business and classification

Company	HDFC Life Insurance Company Limited (HDFCLIFE.NS); ISIN INE795G01014
Sector / industry	Unclassified / n/a
Economic archetype	Life Insurance (INSURANCE)
What that means	Long-duration actuarial liability book modeled on Annualised Premium Equivalent (APE), Value of New Business (VNB), VNB margin %, persistency and Indian Embedded Value (IEV).
Routed valuation method	EMBEDDED_VALUE; allowed: EMBEDDED_VALUE, P_IEV_MULTIPLE, VNB_MULTIPLE
Regulated financial	yes

Industry model the forecast is built on

Template	n/a
How revenue is built	N/a
Why	n/a
Key drivers	n/a
Operating leverage	no
Commodity exposures	none modelled
Benchmark peers	HDFCLIFE.NS, SBILIFE.NS, ICICIPRULI.NS
Life-cycle stage	MATURE_GROWTH (REGULATED_BALANCE_SHEET). Revenue CAGR 12.3% over 4 reported periods, latest EBIT margin 1.6%. Stage bands: >=20% high growth, >=10% mature growth, >=0 mature stable, <0 decline.
Cyclicality	UNAVAILABLE: Cyclicality needs at least 5 usable periods to distinguish a cycle from a trend; 4 are available. Refusing to classify a company as cyclical or stable on too little history.

Official macro backdrop (RBI)

Status CURRENT. Read from RBI's own pages on 2026-10-19; each page's sha256 is in the source ledger. Projections are the RBI's, quoted, not ASTRA's. Record age 13 days.

Indicator	Value	As of	Source
Policy repo rate	5.5 %	2026-10-19	RBI home page (current rates)
Standing deposit facility rate	5.25 %	2026-10-19	RBI home page (current rates)

Industry backdrop

The industry content of this report is the classification, the template the forecast is built on and the measured peer statistics in the valuation pages. No sector forecast or third-party industry outlook is sourced, so none is shown.

Macro inputs the model carries

FMB does not publish its own macro or industry forecast. The macro content of the model itself is the discount-rate environment below; growth and margin drivers are history-derived (see the brief), not a view on GDP, inflation or the cycle.

Risk-free rate	6.95% — Reserve Bank of India 10-Yr G-Sec Benchmark Yield (7.10 GS 2034) (as of 2026-08-28; status configured_fallback)
Equity risk premium	4.20% base; country-risk adjustment 1.30%
Beta	raw 0.891, adjusted 0.927 against NIFTY 50 Index (3 Years Weekly); method PROVIDER_QUOTE
Cost-of-capital basis	Model Assumption Override

Management guidance

No verified management guidance is attached to this snapshot. None is inferred. (Personal biographies of executives are deliberately not part of this report.)

B. Annual and quarterly statements

Reported years (A) and FMB's forecast (E) on one axis. A line the source does not carry is n/a, never zero. All amounts INR crore unless stated (1 crore = 10 million); fiscal year ends 31 March; A = reported, E = FMB forecast; dates are ISO (YYYY-MM-DD).

Income statement (lender template, as filed)

INR crore	FY23A	FY24A	FY25A	FY26A
Diluted EPS (INR)	6.30	7.24	8.33	8.80

Balance sheet (lender template, as filed)

INR crore	FY23A	FY24A	FY25A	FY26A
Total assets	2,48,069	3,02,687	3,49,412	3,90,502

Cash flow

A lender's cash-flow statement mixes deposit and loan flows with operations, so FMB does not publish one for this archetype and none is shown. The forecast for this archetype is built by a sector engine and valued on residual income; no generic three-statement model is forced onto it.

Quarterly results

UNAVAILABLE: NSE quarterly listing unreachable: RIGHTS_BLOCKED: NSE session-cookie API is paused by the owner pending legal review (nseSessionCookie); set ASTRA_ALLOW_NSE_SESSION_API=1 only after that review. No quarterly figure is estimated.

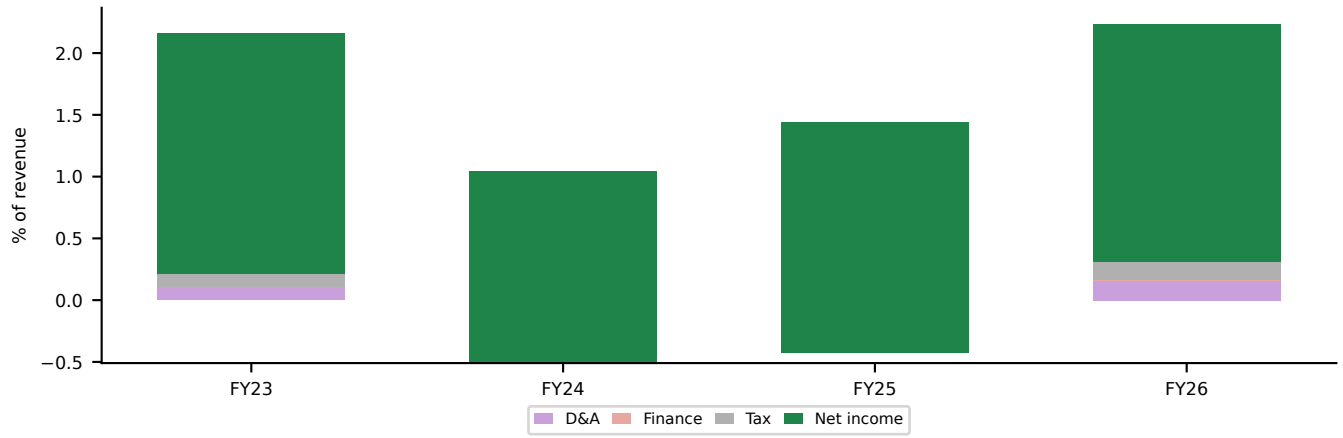

C. Common-size statements

Every line as a percentage of its base (revenue for the income statement, total assets for the balance sheet): the engine's published common-size series.

Income statement, % of revenue

% of revenue	FY23	FY24	FY25	FY26
EBITDA	0.1%	0.6%	1.1%	1.8%
Depreciation & amortisation	0.1%	0.1%	0.1%	0.2%
EBIT	0.0%	0.6%	1.0%	1.6%
Finance costs	0.0%	0.0%	0.0%	0.0%
Profit before tax	2.1%	1.0%	1.3%	2.1%
Net income	1.9%	1.6%	1.9%	1.9%

Where each rupee of revenue goes (the lines the filing itemises)

The stack can exceed 100% by other income, which is not a revenue line; a lender's template itemises only finance cost, tax and profit.

Balance sheet, % of total assets

% of total assets	FY23	FY24	FY25	FY26
Cash And Equivalents	0.5%	0.5%	0.5%	0.5%
Trade Receivables	0.0%	0.0%	0.0%	0.0%
Property Plant Equipment	0.4%	0.5%	0.6%	0.7%
Trade Payables	1.7%	1.2%	1.0%	1.1%

Common-size uses reported years only; forecast years are not restated into common-size by the engine.

D. Operating segments

Ind AS 108 segment disclosure as filed (gross of inter-segment eliminations).

Segment split not available for this issuer: no Ind AS 108 segment disclosure was read for this issuer and the provider published no split. Nothing is estimated.

E. Expenses and margins

Cost lines and margins, reported then forecast.

Lender economics: margins are measured against the balance sheet, not revenue. Every row is a simple ratio of two filed lines (derived here, labelled).

% (derived)	FY23A	FY24A	FY25A	FY26A
Net interest income / total assets (derived)	n/a	n/a	n/a	n/a
Cost-to-income (opex / (NII + non-interest income)) (derived)	n/a	n/a	n/a	n/a
Provisions / advances (derived credit cost proxy)	n/a	n/a	n/a	n/a
Advances / deposits (derived)	n/a	n/a	n/a	n/a
Book equity / total assets (derived)	n/a	n/a	n/a	n/a
Return on closing book equity (derived)	n/a	n/a	n/a	n/a
Return on closing assets (derived)	n/a	n/a	n/a	n/a

F. Property, plant and equipment, capex and depreciation

Not applicable as a driver for a lender: its productive asset is the loan book, shown with funding in annex G. Premises and equipment are not a modelled line for this archetype.

G. Working capital and capital allocation

A lender has no trade working capital; its balance-sheet engine is the loan book and its funding. Filed lines, then the simple ratios derived from them.

INR crore	FY23A	FY24A	FY25A	FY26A
Total assets	2,48,069	3,02,687	3,49,412	3,90,502

Capital allocation	FY23A	FY24A	FY25A	FY26A
Net profit	n/a	n/a	n/a	n/a
Dividends paid	n/a	n/a	n/a	n/a
Dividend payout (derived)	n/a	n/a	n/a	n/a

H. Ratios, DuPont and forensic screens

Reported years. Ratios are the engine's published series; forensic screens flag, they do not prove.

Lender ratios

% (derived from filed lines)	FY23A	FY24A	FY25A	FY26A
Net interest income / total assets (derived)	n/a	n/a	n/a	n/a
Cost-to-income (opex / (NII + non-interest income)) (derived)	n/a	n/a	n/a	n/a
Provisions / advances (derived credit cost proxy)	n/a	n/a	n/a	n/a
Advances / deposits (derived)	n/a	n/a	n/a	n/a
Book equity / total assets (derived)	n/a	n/a	n/a	n/a
Return on closing book equity (derived)	n/a	n/a	n/a	n/a
Return on closing assets (derived)	n/a	n/a	n/a	n/a

The engine publishes no operating-company ratio series, DuPont or Altman / Piotroski / Beneish screen for a lender: those screens are built for non-financial balance sheets and are not applied. Accounting-quality assessment: UNAVAILABLE.

I. Valuation: scenarios, relative and absolute value, reverse DCF

Bull / base / bear, the method ranges, trading comparables and what the price implies. Ranges, sensitivity grid and stress test follow on the next pages. All amounts INR crore unless stated (1 crore = 10 million); fiscal year ends 31 March; A = reported, E = FMB forecast; dates are ISO (YYYY-MM-DD).

Absolute value: the primary method and its cross-checks

Primary method	EMBEDDED_VALUE (status INVALID)
Fair value per share	WITHHELD
Price	INR 524.90

Scenarios: bull / base / bear

FMB published no scenario set for this issuer.

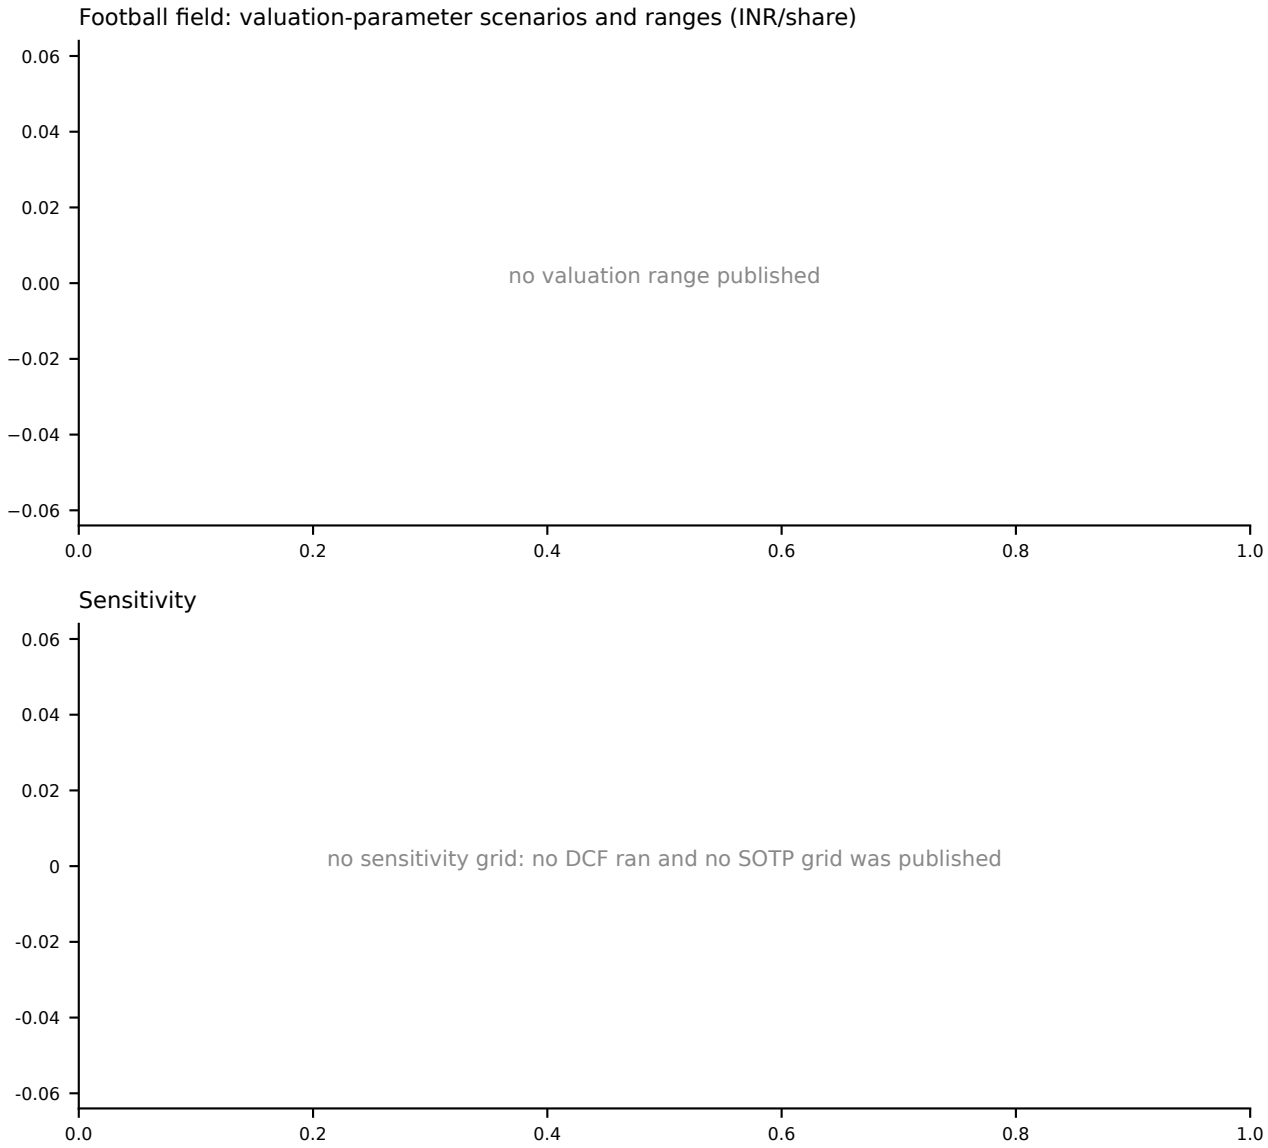

Relative value

Trading comparables: consolidated trading comps are not the method for this archetype (EMBEDDED_VALUE); segment peers are shown inside the SOTP. The peer statistics (median, quartiles, sample size) are in the brief and on the workbook's Peers sheet.

Reverse valuation: what the price implies

Reverse valuation: NOT_ELIGIBLE. a reverse DCF inverts a consolidated FCFF DCF, which this archetype's methodology prohibits

HDFCLIFE.NS · valuation: EMBEDDED_VALUE

I. Valuation: ranges, sensitivity grid and stress test. Source: FMB snapshot snap_HDFCLIFE_NS_0a557c5b14ac; statements from provider-reported secondary statements, not audited (annex K); price 2026-10-30. All amounts INR crore unless stated; fiscal year ends 31 March; A = reported, E = FMB forecast.

J. Monte Carlo: histogram, CDF, tornado, fan

SUPPLEMENTARY / EXPERIMENTAL: a sensitivity of the DCF to correlated economic drivers. It is not a forecast and not a second fair value.

Not drawn for this issuer. Engine statement: no Monte Carlo was published

A distribution is never invented where the engine withheld one. An issuer valued by sum-of-the-parts, a residual-income model or without an FCFF DCF has nothing to simulate.

K. Source ledger and accounting checks

Where each statement came from, what was compared with it, and every identity the model had to satisfy. Source URLs are clickable.

Source documents (annual statements)

Line-level statutory sources are not attached to this snapshot (recorded filings carry the compressed series only).

Source documents (quarterly results)

UNAVAILABLE: NSE quarterly listing unreachable: RIGHTS_BLOCKED: NSE session-cookie API is paused by the owner pending legal review (nseSessionCookie); set ASTRA_ALLOW_NSE_SESSION_API=1 only after that review
